Professional Summary (Fullstack Developer)

Enthusiastic Information Management student pursuing a Bachelor's degree, with the hands-on skills in HTML, CSS, JS, MySQL, Data Analysis, Python Django, and PHP. Ready to bring a positive attitude, adaptability, and fresh ideas to a supportive team environment.

Education

Orchid International College

Bachelor of Information Management

Expected Graduation Date: 2024

Modern College of Management

Computer Science

Skills

Technical Skills

HTML | CSS | JavaScript | Python | Django | Data Science | PHP | Java | MySQL | MS Office | Selenium | React | Selenium | Hardware Device Integration | RESTful APIs

Soft Skills

Teamwork | Communication | Problem Solving | Time Management | Flexible | Debugging

Experience

Python Django Intern

Goodwish Engineering

Jan 2025 – Mar 2025

- Focused on backend development of an Attendance System using Python and Django.
- Developed and tested RESTful APIs for employee registration, attendance logging, and role-based access.
- Designed and implemented database models for users and attendance records.
- Gained practical experience in version control (Git) and debugging backend issues.
- Collaborated with the frontend team to ensure smooth integration and data flow.

Fullstack Developer

Goodwish Engineering

Apr 2025 – Present

- Took on a broader role by contributing to both frontend and backend development in ongoing and new projects.
- Continued building robust backend systems with Django and enhanced API performance and security.
- Worked on frontend features using HTML, CSS, JavaScript, and integrated them with backend logic.
- Played a key role in deploying applications to production, managing server environments, and handling post-deployment maintenance.
- Improved system functionality based on user feedback and contributed to new feature planning and execution.

Projects History

Stationery Management System

Personal Project

Nov 2023 – Feb 2024

- Developed a comprehensive online platform for ordering stationery products, catering to both customers and business.
- Enabled customers to browse, select, and order products seamlessly online.
- Integrated a secure payment gateway for smooth and reliable transactions.

Attendance System (Backend)

Client Project

Jan 2025 – Mar 2025

- Developed backend functionality for an employee attendance system using Django.
- Integrated the system with a hardware attendance device for real-time log collection.
- Created and managed RESTful APIs for handling attendance records, authentication, and role-based access.
- Followed the MVC architecture for clean code organization and scalability.

NDA Website (Fullstack)

Client Project

Mar 2025 – Apr 2025

- Built responsive frontend using HTML, CSS, Tailwind CSS, and integrated it with React.
- Developed RESTful APIs using Django to handle dynamic content and backend operations.
- Ensured seamless frontend-backend integration for optimal performance and user experience.

Consultancy Website (Fullstack)

Client Project

Apr 2025 – Jun 2025 (Expected)

- Designing and implementing frontend using HTML, CSS, Tailwind CSS, and React.
- Developing RESTful APIs with Django for contact forms, service listings, and user interactions.
- Ensuring mobile responsiveness and clean UI/UX design aligned with client requirements.
